

Rubber Floor Tiles

Rubber floor tiles are non-toxic and non-polluting products produced by molding hot-solid forming with rubber particles and rubber powder as the main raw materials. The products are shock-absorbing, non-slip, elastic, protective, weather-resistant, temperature-resistant, and easy to clean. Diverse, rich in color, easy to construct, can be laid with adhesive bonding, or directly laid on the floor

SPECIFICATION

Rubber Floor Tiles							
Item No.	Rebound Data	Hardness (±5)	Tensile Strength	Compression set	Working Temp.	Fire Resistance	Fire Retardant
	g/cm ³	Shore A	MPA	%	°C	%	%
HK2014	32	40+/-5	1.3	90	-30 ~ +100	None	3%
Thickness	10~50mm						
Width	300/500/600/1000mm						
Length	300/500/600/1000mm						
Color	Red, Deep Green, Light Green, Blue, Grey, Yellow						
Note	Top level with Fine material, Bottom lever with crude material
